Claims 5-6 and 12 have been amended as follows:

5. (Amended)   Process according to ~~any of the previous claims,~~ claim 1, characterized in that the identification data requested from the client consists of a couple [identification code/client password] (ID/MPC).

6. (Amended)   Process according to ~~any of the previous claims,~~ claim 1, characterized in that the step of requesting the authentication password (MPAUT) from the user takes place during a predetermined time-out delay beyond which the authentication is denied.

12. (Amended)   Application of the securing process according to ~~any of the 1 to 8 claims~~ claim 1 in a system for authenticating digital creations comprising third parties of time stamping, authentication and archiving connected to a first communication network, characterized in that each third party site locally comprises software means (i) for transmitting securing data in voice form to a client site which requests an authentication operation, through a mobile communication equipment attached to the aforesaid client site and connected to a second communication network, and (ii) for receiving through the first communication network an authentication password resulting from the aforesaid securing data.
